Brand: OFI Testing Equipment, Inc.

Phone: 832-320-7300 - Email: sales@ofite.com

Product Code: 165-65

Availability: Call for availability

Lead Time: 30

Description

The Reverse Phase Extraction Test Kit is used for the determination of crude or formation oil, or other petroleum oil contamination, in non-aqueous fluids used in oil and gas exploration. The test method is intended to be used as a positive/negative test to determine the presence of crude oil in NAF prior to discharging drill cuttings from offshore drilling and production platforms. $<|i| > Size: 20.75" \times 13.5" \times 16.75" (53 \times 34 \times 43 \text{ cm})
