

Thermocup without Removable Stainless Steel Cup, Reconditioned

Brand: OFI Testing Equipment, Inc.
Product Code: 130-38-20-99
Availability: 4

Description

The Thermocup is designed for controlling the temperature of a mud sample while taking readings with a viscometer. The holes in the stage of OFITE Viscometers have been positioned to hold the heated cups at a 45° angle to the line of the instrument for better accommodation of thermometers and power cables. A removable stainless steel cup (optional) makes cleaning safer and easier.

Features

- Anodized finish provides better heat transfer than paint
